IELTS AI Tutor by IELTSGRADER

How to reply, create posts, build trust, and convert on
Facebook - Instagram - Reddit - Quora - Twitter/X - LinkedIn - TikTok - YouTube

Site: <https://ieltsgrader.com>

Primary CTA: Get your free band score

1. Mission & product facts

Your job is to help real IELTS students with writing advice, earn trust, and - only when appropriate - invite them to try a free evaluation on ieltsgrader.com. You are not running ads. You are building authority through replies and useful content on our brand accounts.

One-line positioning

"IELTS AI Tutor by IELTSGRADER - Your AI writing tutor that grades essays in 60 seconds, explains every mistake, and builds a personalized plan to reach your target band."

What we are

- AI writing tutor for IELTS (Task 1 & 2, Academic & General Training)
- Criterion-by-criterion feedback (TR, CC, LR, GRA) - not just a score
- Fix cards, model answers, study plans, mock exam mode
- Free evaluation to start - no card required for first try messaging

What we are NOT / never say

- "Just a grader" or "ChatGPT wrapper"
- Guaranteed Band 7 / 100% accurate / official IELTS replacement
- Link spam, fake reviews, or sockpuppet accounts
- Unverified claims ("10k students", "4.9 rating") unless management approves

Approved URLs

- <https://ieltsgrader.com>
- <https://ieltsgrader.com/ielts-ai-tutor>
- <https://ieltsgrader.com/ielts-essay-checker>
- <https://ieltsgrader.com/ielts-task-2-checker>
- <https://ieltsgrader.com/ielts-task-1-checker>
- <https://ieltsgrader.com/blog>

Prefer UTM tags when possible, e.g. `?utm_source=reddit&utm_medium=social&utm_campaign=organic_reply`

2. How to respond for conversion

Most conversions from social come from helpful replies, not polished ads. Use this ladder on every platform.

Reply ladder

- Step 1: Answer the question with one concrete tip (name a criterion or give a before/after).
- Step 2: Invite a small next step without selling ("Paste one paragraph and I'll hint at the issue").
- Step 3: Only if they ask for tools / tutors / checkers - soft mention + disclosure.
- Step 4: Place the link where the platform allows (bio, description, allowed comment). Never dump 5 links.
- Step 5: Reply again when they respond. Conversations convert; hit-and-run does not.

Disclosure (required when promoting)

"Full disclosure: I'm affiliated with IELTS AI Tutor by IELTSGRADER (ieltsgrader.com)."

Soft CTA (safe)

"If you want criterion-by-criterion feedback in about a minute, we built a free evaluation at ieltsgrader.com - no pressure either way."

Helpful reply without product

"Your Task Response is clear, but paragraph 2 doesn't fully develop the idea - add a specific example. For Coherence, your transition should contrast the previous point, not open a new topic."

When to link vs bio-only

Situation	Link placement
They asked for a tool / checker / tutor	One URL + disclosure (or bio if Reddit-strict)
General writing tip thread	No link - teach; offer more help
Our own post / Short / Reel	Bio + description / pinned comment
Platform bans outbound links in posts	Link in bio only; say "link in bio"

3. Creating posts & frequency

With one person covering eight platforms, repurpose ruthlessly: one short video becomes YouTube Short + TikTok + Instagram Reel with different captions.

Cadence targets

Platform	Create	Engage
Reddit	1 value post / week	Daily comments (value first)
Quora	3-5 answers / week	Reply on your answers
Twitter/X	4-7 posts/threads / week	Daily replies
YouTube	3-5 Shorts / week	Daily comment replies
Instagram	3-5 Reels + Stories	Comments + DMs
TikTok	3-5 videos / week	Comment replies
LinkedIn	2-3 posts / week	Comment on edtech/IELTS
Facebook	2-3 page posts / week	Helpful group comments

Weekly rhythm

- Monday: Run the weekly discovery script; pick high-engagement threads to join.
- Tue-Thu: Publish scheduled content; hit daily Tier-1 replies (Reddit, Quora, X).
- Friday: Deep replies on the biggest threads of the week.
- Sunday: Scorecard - posts, replies, clicks, backlog for next week.

4. Post quality & details

Hooks that work for IELTS writing

- "This Band 6 sentence is why you're stuck at 6.5."
- "Task Response isn't grammar - here's the real issue."
- "12 better alternatives to 'increased' for Task 1."
- "Formal vs semi-formal GT letters in 30 seconds."

Structure

- Short-form video (45-60s): Hook -> problem sentence -> fix -> soft CTA.
- Text post: Claim -> one example -> checklist -> invitation to ask a question.
- Carousel / slides: Band 6 vs 7 side-by-side; one criterion per slide.
- Long answer (Quora/LinkedIn): Answer first, product last, disclose clearly.

Visual / production checklist

- Vertical 9:16 for Shorts / Reels / TikTok; burn-in captions (many watch muted).
- Brand feel: deep navy text overlays (#1a1f36) + clear blue accent (#3B82F6).
- Show real essay lines on screen - abstract tips underperform.
- Same edit -> three platforms; rewrite caption and hashtags per network.

Hashtags & tags

Use 3-8 relevant tags, not 30. Prefer: #IELTS #IELTSWriting #Task2 #Band7 #StudyAbroad - mix with 1-2 niche tags.
On LinkedIn, prefer @mentions over hashtags.

Banned / cautious phrases

Avoid	Say instead
100% accurate	Aligned with official band descriptors
Guaranteed Band 7	Plan toward your target band
Best IELTS grader	AI tutor with criterion-level feedback

5. How to build trust

- Warm-up: On Reddit especially, comment helpfully for 1-2 weeks before product mentions.
- Consistency beats virality: show up daily on Tier 1 platforms.
- Proof > praise: show criterion breakdowns and before/after sentences, not fake 5-star walls.
- Honesty: admit AI limits; recommend human tutoring when that is better.
- Disclosure: always when you mention our product. Hidden promo destroys accounts.
- Respect rules: each subreddit, Facebook group, and Quora space has different promo norms.
- Never buy engagement, comments, or followers.
- Never argue with examiners, competitors, or frustrated students - stay calm and useful.

6. Platform playbooks

6.1 Facebook

- Best for: study-abroad parents, GT candidates, local IELTS groups.
- Formats: short tips, carousel images, live Q&A occasionally; reuse Reels as Facebook video.
- Groups: answer sincerely; follow each group's promo rules. Prefer help over links.
- Page: 2-3 posts/week; pin a "Start free evaluation" post with clear value.
- Conversion: send to Profile / About link or comment link when the group allows; use disclosure.
- Gain most: join 3-5 active IELTS/study groups; become the person who gives criteria tips.

6.2 Instagram

- Best for: visual band comparisons, Reels discovery, Stories for daily tips.
- Formats: Reels first; carousels second; Stories for polls ("Band 6 or 7 intro?").
- Link: link in bio (ieltsgrader.com). Say "link in bio" in captions - avoid raw URLs if they hurt reach.
- Cadence: 3-5 Reels/week aligned with YouTube/TikTok edit.
- Conversion: bio link + Stories swipe / link sticker when eligible; DM auto-reply optional with disclosure.
- Gain most: series content ("Band 6 vs 7" week) and reply to every comment with a mini-tip.

6.3 Reddit

- Best for: highest-intent questions ("grade my essay", "stuck at 6.5").
- Subs: r/IELTS (primary), r/EnglishLearning, study-abroad / visa subs (careful).
- Formats: long value posts; detailed comments. Link dumps get removed or downvoted.
- Cadence: 1 value post/week + daily helpful comments. Karma before promo.
- Conversion: teach first. Mention product only when asked or highly relevant + disclose. Prefer bio/profile.
- Gain most: answer under high-upvote threads from the weekly CSV; offer to review one paragraph.
- See also: SEO/guides/REDDIT.md for ideas and templates.

6.4 Quora

- Best for: evergreen SEO - answers rank for years.
- Formats: 300-800 word answers with structure (criteria headings, examples).
- Cadence: 3-5 quality answers/week; update old popular answers.
- Conversion: answer fully; add a short disclosure + link at the end if tool-relevant.
- Gain most: target questions like "How can I check my IELTS essay?" and "IELTS writing feedback tools".

6.5 Twitter / X

- Best for: fast tips, threads, joining conversations with tutors and candidates.
- Formats: 1 tip + example; threads for Band 6 vs 7; quote-repost with added value.
- Cadence: 4-7 posts/week + daily replies.
- Conversion: link sparingly; pin a free-eval tweet; use bio link as default.
- Gain most: reply within hours to viral IELTS threads; be the clearest explainer, not the loudest.

6.6 LinkedIn

- Best for: parents, teachers, education partners, professional credibility.
- Formats: 120-250 word posts with line breaks; story + lesson; soft CTA.

- Cadence: 2-3 posts/week; comment on IELTS / immigration / edtech posts.
- Conversion: link with disclosure in post or first comment; invite free evaluation.
- Gain most: thought leadership ("What AI feedback should and should not claim") builds trust faster than tips alone.

6.7 TikTok

- Best for: short discovery; same edit as Shorts/Reels.
- Formats: hook in 1s; on-screen essay text; captions native style (line breaks, light humor).
- Cadence: 3-5/week. Link in bio.
- Conversion: "free essay check - link in bio"; pin a comment with soft CTA + disclosure.
- Gain most: trend audio only if on-brand; otherwise speak clearly over simple B-roll of text edits.

6.8 YouTube

- Best for: authority + searchable how-tos; Shorts for reach.
- Formats: Shorts 45-60s; optional longer walkthroughs of sample essays.
- Cadence: 3-5 Shorts/week; reply to comments daily.
- Description: include ieltsgrader.com + free eval CTA; pin comment with link.
- Conversion: end every Short with spoken CTA; "Get full criterion feedback free - link below."
- Gain most: series (Band 6 vs 7, Task 1 verbs, GT tone). See SEO/guides/YOUTUBE_SHORTS.md.

7. Weekly listening (discovery scripts)

Every Monday, run the weekly script so you know where IELTS grading/tutor conversations happened in the last 7 days. Also use the historical CSV to find evergreen high-engagement threads worth learning from (not spamming).

Commands

```
cd SEO/social-media/scripts
pip install -r requirements.txt
cp .env.example .env # add SERPER_API_KEY and YOUTUBE_API_KEY
python3 search_weekly.py
python3 search_historical.py # occasional / onboarding
```

CSVs include: platform, url, title, snippet, published_at, engagement fields when available (Reddit/YouTube), query, source. Prioritize rows with high engagement_score. Serper-sourced platforms may show engagement_unknown - still useful for finding public posts to engage with thoughtfully.

8. Weekly scorecard

Metric	Starting target
Helpful replies (all platforms)	>= 50 / week
Original posts / Shorts (with repurposing)	>= 12 / week
High-intent threads engaged (from CSV)	>= 10 / week
Bio / profile link clicks	Track in Insights
Free evaluations from social	Track UTMs if used

Remember

Value first. Disclose when you promote. No guarantees. Teach so well that students ask for the tool - then convert with one clear link to ieltsgrader.com.
